

D7.2 Data Management Plan v1.0

Project ref. no.	Horizon 2020-DT-SFS-14-2018 GA No. 818318
Project title	Empower consumers to PREVENT diet-related diseases through OMICS sciences
Duration of the project	1 November 2018 - 31 October 2020 (36 months)
WP/Task:	WP7: Dissemination and exploitation. Task 7.4 Knowledge and Data Management
Dissemination level:	CONFIDENTIAL
Document due Date:	30/04/2019 (M6)
Actual date of delivery	30/04/2019 (M6)
Leader of this deliverable	ICCS
Document status	Final

Deliverable Information Sheet

Version	Date	Author	Document history/approvals
0.1	14/01/2019	ICCS	First draft with ToC
0.5	25/03/2019	ALL	Input from partners integrated
0.8	07/04/2019	ICCS	Second draft circulated to partners
0.9	17/04/2019	ICCS, ALL	Partners comments incorporated. Version ready for internal review by EUT legal department and EUT communication department
1.0	26/04/2019	ICCS	Final version ready for submission
1.0	30/04/2019	EUT - Project Coordinator	Final revision and submission

Abstract

Management of data is an important element of large scale multi-disciplinary projects. As such, PREVENTOMICS will be collecting, using and generating a heterogeneous set of data throughout its lifecycle. This deliverable is the initial version of the project's Data Management Plan and explains the proposed actions for the overall control of PREVENTOMICS's data and publications. The deliverable embarks with a summarisation of the types and sources of data and continues with the description of the practices for safeguarding that the PREVENTOMICS research data are findable, accessible, interoperable and re-usable (FAIR). An account of the allocated resources for data management is included. The deliverable concludes with an appreciation of the data security and ethical considerations principles to be adopted.
